Dear Mrs. Reuter-Wagner,

The Vienna Institute for International Economic Studies would like to investigate the different forces of globalisation and their effects on labour demand elasticities. To answer this research question the institute would like to have access to the Belgian EU-SILC micro data at 2-digit NACE level for the reference years 2000 – 2017.

Statistics Belgium agrees to the provision of SILC data by Eurostat about the Belgian EU-SILC Survey 2000-2017 including NACE Rev.2 2-digit level (01-99).

Best regards,

Nico WAEYAERT,
Director-general
