

Statistical product

Yearly balance for renewable and waste fuels

The yearly balance for renewable and waste fuels presents all the national and cross-border transactions for these energy sources that took place in the year. It gives an overview of the gross production of electricity and heat by type of renewable and waste fuel, of domestic production, of international trade (imports by country of origin and exports by destination), of the net and distribution losses, of the consumption by economic sector and of the operational production capacity by energy source.

Presentation

<i>Keywords</i>	Energy statistic ; Renewable energy ; Waste
<i>Domain</i>	3.3.02. Energy
<i>Statistical unit - Title</i>	Belgium
<i>Statistical unit - Description</i>	Belgium (geographic administrative)
<i>Statistical population - Title</i>	Belgium
<i>Statistical population - Description</i>	Belgium (geographic administrative)
<i>Geographical coverage</i>	Belgium
<i>Time coverage</i>	-
<i>Sectors</i>	-
<i>Other coverage</i>	-

Reference period

<i>First reference period available</i>	1990
---	------

Institutional mandate

<i>Mandatory statistical production</i>	Statistics produced pursuant to a European legal obligation
<i>Legal reference</i>	Regulation (EC) No 1099/2008 of the European Parliament and of the Council of 22 October 2008 on energy statistics

Confidentiality

<i>Confidentiality - level</i>	Aggregated data, non confidential

<i>User satisfaction</i>	-
<i>Completeness</i>	-

Accuracy and reliability

<i>Accuracy</i>	-
<i>Sampling error</i>	-
<i>Non-Sampling error</i>	-

Timeliness

<i>Timeliness</i>	Results available 11 months after the reference period
-------------------	--

Comparability

<i>Comparability - geographical</i>	All EU countries and IEA members must provide the same balance. The balance for renewable and waste fuels is comparable to the parts of the regional energy balances concerning renewable and waste fuels.
<i>Comparability – Over time</i>	Comparable in time
<i>Comparability - Sectorial</i>	Sectoral comparability
<i>Comparability - Other</i>	-

Coherence

<i>Internal coherence</i>	-
<i>Cross-field coherence</i>	-

Data revision

<i>Data revision - policy</i>	https://economie.fgov.be/fr/themes/energie/lenergie-en-chiffres/politique-de-revision
<i>Data revision - practice</i>	The internal coherence of the data, its coherence compared to other years and compared to the regions is analyzed during the creation of the balance and this for all historic data. If a lack of coherence is detected or if new elements are provided, estimations based on regional and historic data can be made.

Statistical variables

<i>Title</i>	<i>Definition</i>	<i>Unit/Nomenclature</i>
Gross and net calorific values	Calorific capacity for each statistic variable	Megajoule by m ³
Imports/exports	Detail of the quantities imported/exported by country	Metric ton
Inland consumption by sector	-	Unknown
Stock changes	The difference between opening stock level at the beginning of period and closing stock at the end of period (stocks held on national territory)	Terajoules and millions of m ³
