Structure of the population based on the National Register

Statistics on the structure and movement of the population issued by the Statistics - Statistics Belgium Office of the Dept. of Finance provide information on trends in the resident population figure as recorded on the National Register of Natural Persons (RNPP), defined by law. They contain essentially two types of measures: 1) measures relating to the population's characteristics at the beginning and middle of the year (i.e. 1 January and 1 July) and 2) measures relating to population changes by various event categories: births, deaths, immigration, emigration, changes in marital status or nationality.

<i>Keywords</i>	Acquisition of the nationality ; Births ; Change in civil status ; Change of nationality ; Changes of register ; Deaths ; Deletions ; Demography ; Divorces ; Emigration ; Immigration ; Internal migration ; International migration ; Loss of nationality ; Marriage ; Migration ; Natural movement ; Population ; Population movement ; Population number ; Re-registrations that have been deleted ; Residents ; Statistical adjustment ; Structure of the population ; Widowhood
<i>Domain</i>	3.7.07. Population
<i>Statistical unit - Title</i>	Natural persons, legally living in Belgium
<i>Statistical unit - Description</i>	-
<i>Statistical population - Title</i>	Residents in Belgium
<i>Statistical population - Description</i>	The total resident population figure as defined by the law includes all the persons whose main place of residence is located in Belgium and who are registered in a municipality, either in the population register or in the aliens' register or in the register of aliens with a privileged status or in the register of European Union officials. Asylum seekers whose application is being processed, are registered in the waiting register and are not incorporated in the resident population of the municipality, in accordance with Article 3 of the Law of 19 July 1991 regarding population registers, identity cards, aliens' identity cards and residence documents. The same applies

Presentation

to aliens who are not recorded in any register (especially because they have been residing in the Belgian territory for less than three months or are in an irregular situation). This population group is not taken into account in the resident population. It should be noted that this population does not correspond to the whole population registered in the National Register of Natural Persons and legally residing in the territory. Moreover this population does not correspond to the population with habitual residence in the country as defined by the United Nations Statistics Division and Eurostat. In order to meet this special request of European and international statistical bodies, specific statistics have been produced since 2011, using 2010 as a reference year (see document Structure and dynamics of the population with habitual residence in the country (according to European and international definitions)).
